

TECHNICAL & APPLICATIONS

XD151 Dustex Vacs

- effective dust control for fine dust residues
- suitable for concrete & paint dust
- cleaner & more efficient working environment
- reduced hazards through airborne dust
- by-pass motor for continuous use
- cyclone separator removes most of the dust
- high capacity large area cartridge filter
- dust collection in disposable bag
- simple 'blow back' filter cleaning

The new XD151 is a powerful dust extraction vac designed for the efficient collection of fine concrete dust and surface prep residues

The XD151 is suitable for use with hand held concrete chasers, grinders and paint strippers

It features a 1400 watt hi-flow by-pass vacuum motor, pre-filter cyclone separator and high efficiency, long life cartridge filter. The coarser particles are separated out by the cyclone with the large pleated central filter removing the finer dusts down to 0.5 microns

The unit has a heavy duty frame and a rotomoulded vacuum body that is virtually indestructible; it is ideal for hire trade use

Maximum filter performance is maintained with the simple blow back filter cleaner which allows full on suction for long periods. Dust is collected in disposable bags at the base of the unit
